INTERIM REPORT AT MARCH 31ST, 2022

1. GROUP ORGANIZATION

Digital Bros Group develops, publishes and distributes video games on international markets.

The Group is organized into five operational business segments:

Premium Games: the operations consist in the acquisition of video games intellectual properties from developers and the distribution of video games through a traditional international retail sales network and digital marketplaces such as Steam, Sony PlayStation Network, Microsoft Xbox Live, Epic Game Store, etc..

The Group develops part of the video games in its library through the internal studios whereas, the video games developed by external studios are usually either acquired with an exclusive license or assigned to the Group with long-term worldwide rights. The label used for worldwide publishing is 505 Games. A minor label, Hook S.r.l., publishes lower-budget projects.

During the period, Premium Games operations were conducted by the subsidiary 505 Games S.p.A. which controls 505 Games France S.a.s., 505 Games Ltd., 505 Games (US) Inc., 505 Games Spain Slu and 505 Games GmbH which operate respectively on the French, UK, U.S., Spanish and German markets. 505 Games Interactive (US) Inc. provides consultancy services on behalf of 505 Games S.p.A. The progressive digitalization of the market and the following centralization of sales on the Italian company enabled to focus local operations to marketing and PR activities.

The following studios are also included in the Premium Games segment:

- the Italian company Kunos Simulazioni S.r.l., which develops and publishes the Assetto Corsa video game;
- the Dutch company Rasplata B.V. (60%) that owns an intellectual property currently under development;
- the Czech company Ingame Studios a.s. (60%), a Brno-based studio developing the video game based on the intellectual propriety owned by Rasplata B.V.;
- the Italian company Avantgarden S.r.l., an Italian development studio with a team of around eleven people;
- the Italian company Supernova Games Studios, a Milan-based studio incorporated during the previous fiscal year and with a team of eleven people;
- the Canadian company Chrysalide Jeux et Divertissement Inc. incorporated in June 2021. The company (75% of which is held by the Group) is currently developing a brand-new video game.

A Spanish joint venture was set up last fiscal year together with the development studio MercurySteam Entertainment S.L. - MSE & DB S.L., in order to jointly create a new intellectual property.

Free to Play: the operations consist of the development and publishing of video games and/or apps that will be available for free on digital marketplaces with in-app purchases features. Free to Play video games usually presents less technical complexity than Premium Games but, in case of success, will have a longer life cycle. Free to Play video games are continuously upgraded after the launch in order to retain players and enhance the video game's life cycle.

Worldwide Free to Play publishing is operated by 505 Mobile S.r.l., together with the U.S. company 505 Mobile (US) Inc. (which provides consultancy services to Group companies) and the UK company DR Studios Ltd. which is a developer of Free to Play video games and Hawken Entertainment Inc..

The Australian company 505 Games Pty Ltd. was incorporated in the previous fiscal year. In January 2021 it took over 100% of the shares of Infinite Interactive Pty. and Infinity Plus Two Pty.. The Australian companies own the intellectual property of Puzzle Quest and Gems of War and provide continuous support to the video games.

The label used for publishing on a worldwide basis is 505 Games Mobile.

Italian Distribution: consists of the distribution in Italy of video games purchased from international publishers.

The operations are run by the parent company, Digital Bros S.p.A., under the Halifax brand, and by the subsidiary Game Entertainment S.r.l..

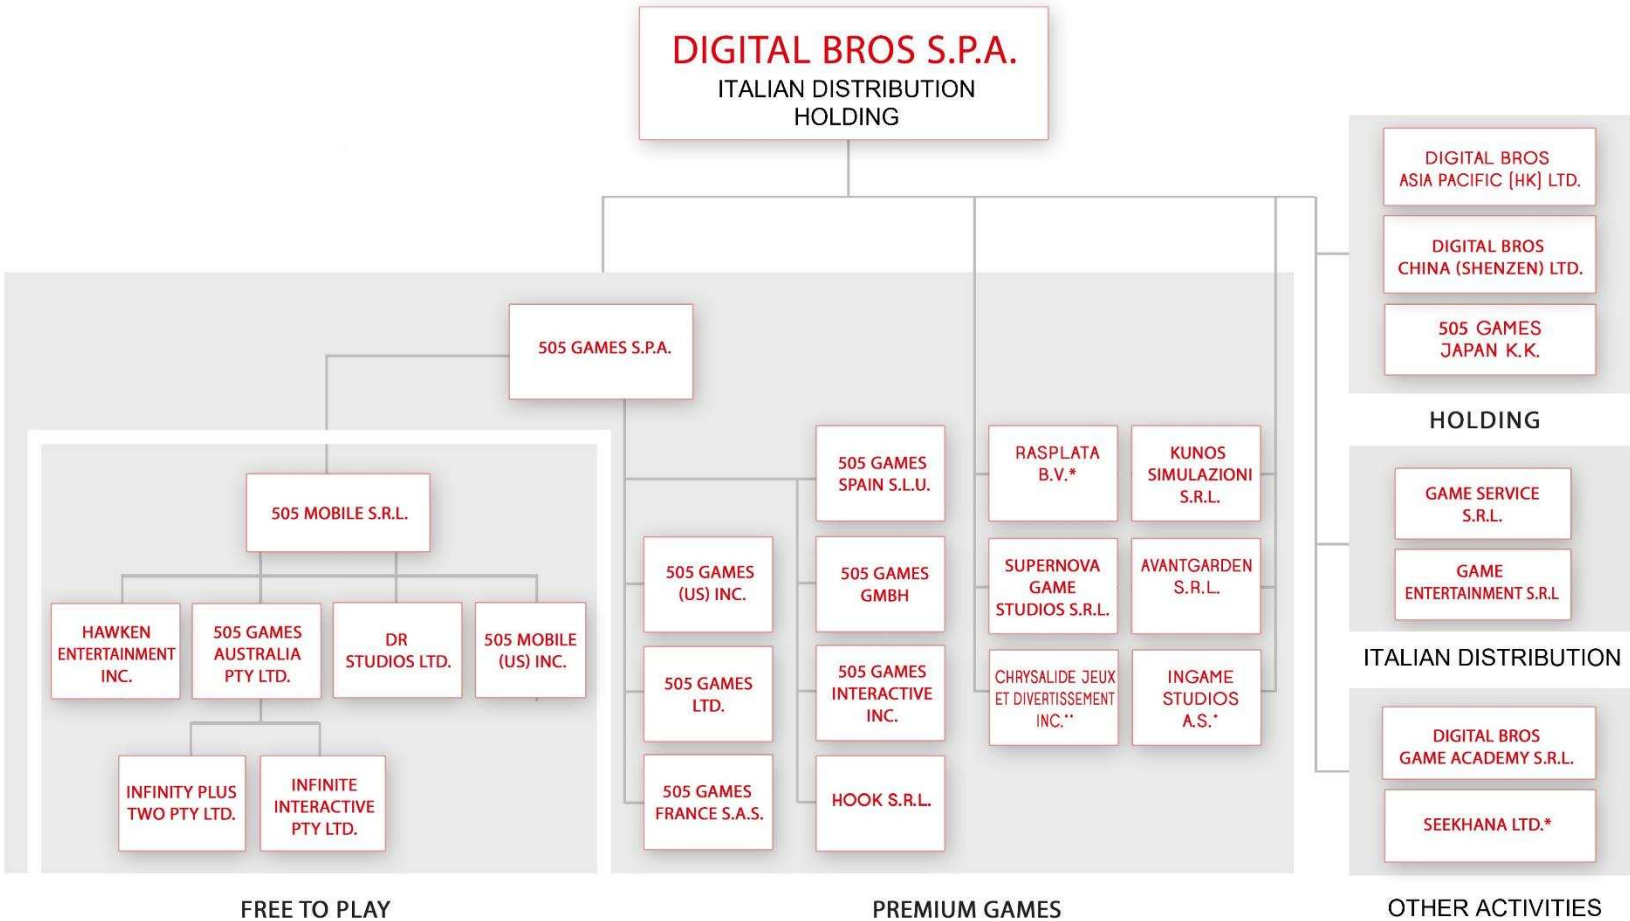

Other Activities: the operating segment groups all the Group's remaining activities that are consolidated together for reporting purposes. It includes the operations of the subsidiary Digital Bros Game Academy S.r.l. which organizes video game training and professional courses. The Group also holds a 60% stake in the UK company Seekhana Ltd..

Holding: it includes all the corporate functions provided by Digital Bros S.p.A. in finance, control system and business development activities. The holding company has been supported by Digital Bros China Ltd., Digital Bros Asia Pacific (HK) Ltd and 505 Games Japan K.K. which have operated as business developers for the Asian markets. Digital Bros Holdings Ltd. has been inactive during the period.

All the companies mentioned above are 100% owned, except for Rasplata B.V., Ingame Studios a.s. and Seekhana Ltd. which are controlled with a 60% stake and Chrysalide Jeux et Divertissement Inc. with a 75% stake.

The organization chart at March 31st, 2022 was as follows:

Rasplata B.V., Seekhana Ltd. and Ingame Studios a.s. (60% investments) as well as Chrysalide Jeux et Divertissement Inc. (75% investment) have been consolidated line-by-line with a separate recognition of the non-controlling interests.

A Spanish joint venture was set up last fiscal year together with the development studio MercurySteam Entertainment S.L. - MSE & DB S.L..

Artactive S.A., a company in which the Group holds a 40% stake, was incorporated under the Polish law during the period. Artactive S.A. is currently developing a new video game on behalf of 505 Games S.p.A.. Both companies are consolidated with the net equity method.

The dissolution of 133 W Broadway Inc. was completed during the period, and the dissolution process of Hawken Entertainment Inc. is still ongoing. In April 2022, Game Service S.r.l. entered into dissolution.

2. VIDEO GAMES MARKET

The video games market represents one of the most important segments of the entertainment industry. Movies, books and magazines, video games and toys are part of the industry and share the same characteristics, brands, features and intellectual properties.

The market is constantly evolving and growing, driven by the continuous technological upgrades. Gaming is no longer limited to personal computers and traditional consoles (Sony, Microsoft and Nintendo), but has expanded to mobile phones and tablet devices. Low-cost fiber connectivity availability, fiber optic networks and smart phones have made video games increasingly diversified, sophisticated and interactive and have expanded the gaming population to adults and women. Cloud gaming is also becoming increasingly popular.

The video games market follows the continuous technological evolution of consoles. At the launch of a new console, the prices of the hardware and the related video games are high and relatively low quantities are sold. Across their lifecycle, console and video game prices gradually decline, while the volumes and the video games quality increase.

Video games are sold through digital marketplaces, however highly popular and high-quality video games are also distributed through the traditional sales channel. In this case, the value chain is as follows:

The COVID-19 pandemic further accelerated the decline of the video games retail distribution being replaced by digital distribution.

Developers

Developers are the creators and programmers of a video game, usually based on an original idea, a successful brand, a movie, sports simulations etc.. It is becoming increasingly common for a highly popular video game to be used into a movie, tv series etc..

Even if developers sometimes retain the intellectual property, they often assign the rights to an international video game publisher for a limited period of time defined contractually. Therefore, publishers play a key role in the value chain: they are essential to the completion of the video game, the building of a community around it and its international distribution through their direct or indirect commercial network.

The developer can directly publish and market the video game. In such a scenario, the financial and operational risks for the developer increase significantly.

Publishers

The publisher is responsible for the launch of the video game, defines the global commercial policy, designs the packaging and assumes all the risks related. Publishers usually finance the video game development process and often acquire the video game intellectual property on a permanent basis.

Console manufacturers

The console manufacturer designs and manufactures the hardware on which the video game is played. Sony produces the Sony PlayStation, Microsoft the Microsoft Xbox and Nintendo the Nintendo Switch. In case of physical distribution, the console manufacturer shall reproduce the physical disk on behalf of the publishers. The console manufacturer also operates as a video game publisher.

Distributors

The role of the distributor is increasingly losing importance as a result of the digital transition. In the future, retail distribution will be concentrated on a limited number of operators.

Retailers

The retailer is the physical place where the consumer buys the video game. Retailers may be international retail chains specialized in the sale of video games, independent shops or web sites that sell directly to the public.

Console manufacturers have created marketplaces where video games can be directly purchased in a digital format without involving a distributor or retailer. In this case, as for smartphone and tablet video games, the value chain involves a lower number of players, as illustrated below:

The main marketplaces on which console video games are sold are Sony's PlayStation Store, Microsoft's Xbox Live and Nintendo's eShop. Steam is the global leader in the digital distribution of video games for personal computers. The US company Epic launched Epic Games Store, a new marketplace for PC games, after the success of Fortnite (owned by the same Epic).

The digitalization of the market has led both Microsoft (with Microsoft Xbox Game Pass) and Sony (with Sony PlayStation Now) to create digital platforms on which players can access the full library of video games by paying a subscription fee. Revenues are recognized to publishers based on the utilization of their video games. More recently, Google and Amazon have set up similar platforms, Stadia and Luna respectively, while Apple has launched Apple Arcade, a platform dedicated to mobile video games. Netflix is also investing in the market.

Free to Play video games are available to the public in digital format only. The marketplaces used are the App Store for iPhone and iPad, the PlayStore for Android for Western markets and a large number of

different marketplaces for Far Eastern markets. Some Free to Play video games are also available on PlayStation Store, Microsoft's Xbox Live, Steam and Epic Store.

Digital distribution has significantly extended the lifecycle of individual video games. The availability of a video game is no longer limited to its launch period as it happens in the retail channel. The product remains available on the different marketplaces for a longer period, generating a continuous flow of sales significantly influenced by seasonal promotional campaigns. A video game life cycle can also be extended through the release of additional episodes and functions (the so-called DLC, or Downloadable Contents).

3. ALTERNATIVE PERFORMANCE MEASURES

The Group uses some alternative performance measures, with continuity and uniformity of representation since different fiscal years, in order to facilitate the comprehension of the consolidated profit and loss and balance sheet.

The following measures are directly showed in the statement of profit and loss:

- Gross profit, difference between net revenue and total cost of sales;
- EBITDA, difference between gross profit and total operating cost plus other income;
- EBIT, difference between EBITDA and total depreciation, amortization and impairment.

The main measure used is the net financial position, as detailed in the specific section of the notes.

The definitions of the measures used by the Group, as they do not derive directly from the accounting standards applied, may not be homogeneous with those adopted by other companies and therefore comparable with them. The report does not provide any reconciliations between the interim and full year measures because they are used on a consistent base.

4. SEASONALITY EFFECTS

Market seasonality is influenced by the launch of highly anticipated and popular products. The launch of a successful video game in a certain period can lead to significant revenue increases between quarters. In fact, the sale of these products is concentrated in the first few days from the release.

The publishing of video games on digital marketplaces has partially reduced the volatility of the publisher's results between quarters. Digital distribution revenues are recognized when the consumer purchases a video game on the marketplace. This occurs gradually and it is not concentrated in the days immediately after the launch, differently from the traditional retail distribution whose revenues are recognized upon consignment of the product to the distributor/retailer, regardless of when the final sale to end consumer effectively occurs.

Digital promotional campaigns are effective and concentrate revenue during these periods. Publishers tend to plan their promotional campaigns when the consumer spending is higher i.e., the Christmas season for European markets or Black Friday for the American market.

Free to Play video games revenues are less influenced by seasonality than Premium video games. Free to Play video games show constant revenue growth over time with some exception for the most anticipated titles. Unlike Premium video games, Free to Play promotions are more weekly-based and therefore, do not create volatility across quarters.

The financial position is closely related to the revenue trend. The physical distribution of a product in a quarter increases net working capital investment. This is temporarily reflected by the level of net cash/debt

until the time as the related sales revenue will be collected. The significant reduction in physical distribution revenues as a percentage of total consolidated revenues resulted in lower volatility of the financial position.

5. SIGNIFICANT EVENTS OF THE REPORTING PERIOD

The most significant events during the period were as follows:

- On October 27th, 2021, the Shareholders' Meeting of Digital Bros Group approved the Financial Statements for the fiscal year 2020-2021, a dividend distribution of Euro 0.18 per share and appointed Ernest & Young S.p.A. as the new auditor for the 2022-2030 period, until the approval of the Financial Statements at June 30th, 2030;
- On November 30th, 2021, the Group announced the agreement between 505 Games S.p.A. and MercurySteam Entertainment S.L. for the co-publishing and development on a new video game for multiplatform release. The intellectual property (IP) of the video game is co-owned by Digital Bros and MercurySteam Entertainment through the joint-venture MSE & DB S.L. set up under the Spanish Law. The initial development investment amounts to Euro 27 million.

Relations with Starbreeze AB and Starbreeze AB shareholders

During the reporting period, no particular changes in relations with the Swedish company Starbreeze occurred.

The Digital Bros Group and the Starbreeze AB Group have entered multiple different transactions, summarized below:

- in May 2016, the Group sold back its PAYDAY2 rights to Starbreeze AB against a payment of USD 30 million and an earn out of USD 40 million as 33% of the net revenues from the future video game PAYDAY3;
- in April 2015, the two groups signed a contract for the development and publishing of the console version of a video game inspired by the TV series The Walking Dead. The contract provided a development budget of USD 10 million. The subsidiary 505 Games S.p.A. had paid USD 4.8 million for the development of such video game. In November 2018, Starbreeze AB launched the PC version of the video game, but the related sales were lower than expected. On February 27th, 2019, Skybound terminated the license contract for The Walking Dead and, consequently, on April 8th, 2019, the subsidiary 505 Games S.p.A. terminated the contract with Starbreeze AB for the development and publishing of the console version;
- since November 2018, Digital Bros S.p.A. has acquired 6,369,061 Starbreeze AB STAR A shares, as traded on Nasdaq Stockholm, at an average price of SEK 1.79 per share.

The OVERKILL's The Walking Dead unsuccess created financial problems to Starbreeze AB, enforcing the company and five subsidiaries to petition the Swedish District Court for admission to a restructuring plan. The Swedish Court approved the restructuring request which was later extended several times until December 3rd, 2019. On December 6th, 2019, Starbreeze AB successfully completed the corporate restructuring process, proposing a payment plan to its creditors.

In January and February 2020, the Group carried out the following transactions:

- on January 15th, 2020, Digital Bros S.p.A. acquired 18,969,395 Starbreeze AB STAR A shares held by Swedish company Varvtre AB for a consideration of around SEK 25.8 million, at a price of SEK 1.36 per share, plus a potential earn-out in case of a gain on disposal realized in the 60 months after the acquisition;
- on February 26th, 2020, Digital Bros S.p.A. completed the acquisition of all of the assets held by Smilegate Holdings in Starbreeze AB for a price of Euro 19.2 million. The assets acquired have a nominal value of Euro 35.3 million, as detailed below:
 - a) a convertible bond of SEK 215 million (around Euro 19.7 million) issued by Starbreeze AB for a total of Euro 16.9 million. The full conversion of the bond would lead to the issue of 131,933,742 new Starbreeze AB STAR B shares. The original conversion price of SEK 2.25 per share was recalculated at SEK 1.63 per share due to the dilution effect of the share capital increase successfully carried out by Starbreeze AB in September 2020;
 - b) a receivable of around USD 16.3 million (around Euro 14.8 million) for consideration of Euro 100 thousand. This loan falls under the Starbreeze AB corporate restructuring process and will be repaid based on the terms of payment approved by the Swedish District Court and not later than December 2024;
 - c) 3,601,083 Starbreeze AB STAR A shares and 6,018,948 Starbreeze AB STAR B shares for a total amount of Euro 2.2 million.

The total consideration was paid as follows: Euro 9.2 million on the closing date of the transaction and Euro 10 million on February 23rd, 2021.

In order to maintain unchanged its stake in the share capital and its voting rights, on June 23rd, 2020, the Group signed a binding agreement for the pro-quota subscription of the share issue to be approved by a future General Meeting of Starbreeze AB. This share issue was finalized in September 2020.

At March 31st, 2022, also as a result of other purchases, the Group holds 61,758,625 Starbreeze AB STAR A shares and 24,890,329 Starbreeze AB STAR B shares representing 11.96% of share capital and 28.91% of voting rights.

Despite the on-going contractual relations and the equity interest held in the Swedish company, the Group does not believe to have any influence over Starbreeze AB. Accordingly, it decided to keep the investment under other investments as in the previous reporting periods. Digital Bros S.p.A. will reclassify the investment in its financial statement, should the circumstances evolve as a result of substantial changes in the relations between the two groups.

COVID-19

The Group adopted remote working arrangements, following the outbreak of the COVID-19 pandemic and the Ministerial guidelines issued from March 2020, later modified several times, in order to guarantee the health and safety of its employees and collaborators. The majority of its employees and collaborators in Italy and abroad may efficiently work from home. Since November, a partial return to the office, limited to certain offices started. From an operational perspective, the remote working arrangements did not have a significant impact on the main areas of operations of the Group.

The most significant effects of the pandemic on the video games market may be summarized as follows:

- increased use of video games during the lockdown period, especially for mass market products, by casual gamers and for discounted products;
- general growth in digital revenues;
- inconsistent revenues from traditional distribution channels, except for the small share generated by e-commerce sales.

In terms of video game development, carried out by teams all around the world, the remote working arrangements led to production delays. These delays were most evident on large development teams and products close to launch when teams are normally required to cooperate to a greater extent.

The digitalization of the market was further accelerated because consumers were unable to access retail stores and the Group's revenues were largely generated on digital marketplaces which enabled a significant increase in the operating margins caused by significant savings in terms of manufacturing and logistics costs.

Gems of War realized Euro 4,372 thousand revenues. This game became part of the Group's intellectual properties portfolio as a result of the acquisition of the Australian studio Infinity Plus Two in January 2021.

The mobile and personal computer versions of Puzzle Quest 3 were launched in March, while the consoles version is scheduled to hit the market next fiscal year.

Purchases of services for resale decreased by Euro 694 thousand because of lower expenditure on live support activities, following the acquisition of Infinity Plus Two Pty Ltd. that took place in the previous fiscal year. Since January 1st, 2021, the live support services performed by the Australian subsidiary were accounted as payroll costs. Details are provided below:

Euro thousand	March 31st, 2022	March 31st, 2021	Change
Live support	0	639	(639)
Quality assurance	42	19	23
Hosting	344	421	(77)
Other	140	141	(1)
Total purchase of services for resale	526	1,220	(694)

Other income amounted to Euro 2,812 thousand increasing by Euro 1,240 thousand compared to March 31st, 2021 due to an increased number of video games developed by the Group's internal studios, notably the future Free to Play version of Hawken developed by the subsidiary DR Studios Ltd. and Puzzle Quest 3 by the subsidiary Infinity Plus Two Pty Ltd..

Total operating costs amounted to Euro 6,540 thousand, increasing by Euro 2,371 thousand compared to the previous fiscal year. Payroll costs grew by Euro 1,911 thousand following the acquisition of the Australian companies that have significantly increased the operating segment's workforce. Cost for services also increased by Euro 410 thousand due to the preliminary marketing activities in preparation of the release of Puzzle Quest 3.

Gross operating margin (EBITDA) amounted to Euro 1,057 thousand (19.4% of net revenue) decreasing by Euro 3,420 thousand compared to Euro 4,477 thousand at March 31st, 2021.

Depreciation and amortization amounted to Euro 1,456 thousand and included the amortization of the difference between the purchase price of the Australian companies and the related shareholders' equity for Euro 1,345 thousand.

Operating margin (EBIT) amounted to negative Euro 399 thousand, compared to Euro 3,966 thousand at March 31st, 2021.

The third quarter gross revenue amounted to Euro 27,625 thousand, a 16.4% decrease compared to the previous fiscal year. The new version of the video game Death Stranding was launched on March 28th, 2022, thus generating a limited revenue stream in the quarter.

Notwithstanding the revenue trend, the quarterly EBIT increased by 32.5% and amounted to Euro 1,781 thousand, thanks to the strong performance of the international publishing operating sector. The significant growth in margins is the result of the product mix with an increased weight of the video games developed by internal studios.

Below the third quarter segment reporting analysis.

11. CONTINGENT ASSETS AND LIABILITIES

The sale of rights to PAYDAY2 by the Group to Starbreeze AB occurred in May 2016 granted the Group the possibility to earn out maximum of USD 40 million to be calculated as 33% of the net revenue that Starbreeze AB will realize on the sales of PAYDAY3. At the reporting date, the Group considered this contractual right as a contingent asset, as in the prior fiscal years, and therefore no amount has been showed in the financial statement.

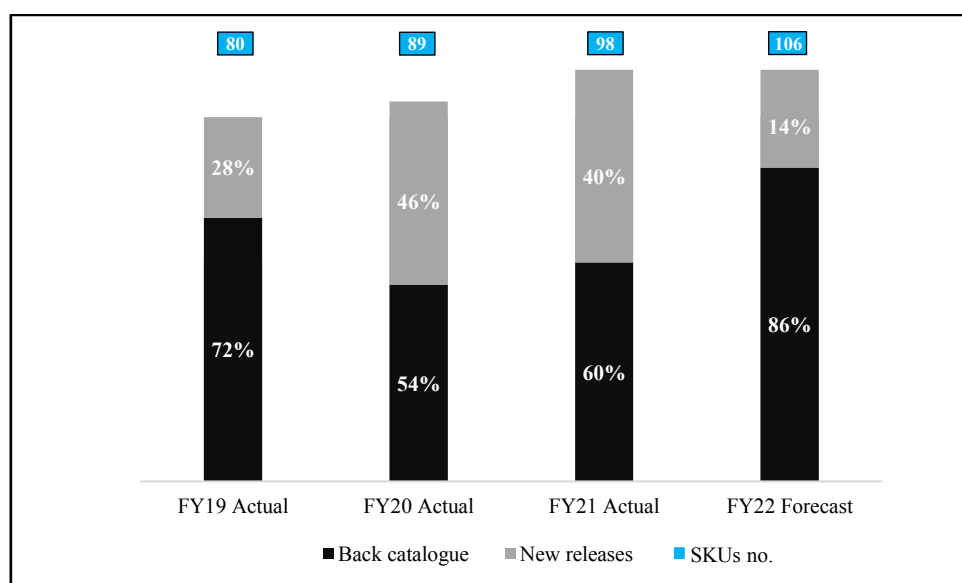

12. SIGNIFICANT EVENTS OCCURRED AFTER MARCH 31ST, 2022

No significant event occurred after the end of the period also having considered external factors.

13. BUSINESS OUTLOOK

Most of the videogames currently under development will hit the market starting from the fiscal year 2023 onwards. The Group has planned to invest more than Euro 50 million during the fiscal year. For the full fiscal year 2022, the Group expects a decline in revenue without any significant new launch, but higher net operating margins (EBIT) thanks to the higher profitability of fully-owned intellectual properties and back catalogue products.

A breakdown of back catalogue and new releases revenue expected for the full fiscal year is provided below with previous fiscal years comparisons:

In sync with the significant investments planned for the full fiscal year, the net financial position, which was positive for Euro 13.2 million at March 31st, 2022, is expected to remain positive while showing a further decrease to return back to increase starting from the first quarter of the next fiscal year.

14. OTHER INFORMATION

EMPLOYEES

The following table reports analysis of the number of employees at March 31st, 2022 with comparative figures at March 31st, 2021:

Category	March 31 st , 2022	March 31 st , 2021	Change
Managers	13	8	5
Office workers	353	228	125
Blue-collar workers and apprentices	4	6	(2)
Total employees	370	242	128

The increase in the number of office workers was the effect of the acquisition of Infinity Plus Two Pty Ltd., Infinite Interactive Pty Ltd. and Ingame Studios a.s. and of the incorporation of Chrysalide Jeux et Divertissement Inc. and Supernova Games Studios S.r.l..

The following table details the number of employees of non-Italian companies at March 31st, 2022 with comparative figures at March 31st, 2021:

Category	March 31 st , 2022	March 31 st , 2021	Change
Managers	8	3	5
Office workers	267	152	115
Total employees outside Italy	275	155	120

The average number of employees for the period is calculated as the mean number of employees at the end of each month. It is shown below with corresponding prior year figures:

Category	March 31 st , 2022	March 31 st , 2021	Change
Managers	13	7	6
Office workers	340	214	126
Blue-collar workers and apprentices	4	7	(3)
Total average employees	357	228	129

The average number of employees of the non-Italian companies is as follow:

Category	March 31 st , 2022	March 31 st , 2021	Change
Managers	8	2	6
Office workers	257	136	121
Total average employees outside Italy	265	138	127

Employees of the Group's Italian companies are contracted under the current Confcommercio national collective employment agreement for the commercial, distribution and services sector. Employees of the three Italian studios - Kunos Simulazioni S.r.l., AvantGarden S.r.l. and Supernova Games Studios S.r.l. – are contracted under the national collective employment agreement for the mechanical industry.

ENVIRONMENTAL ISSUES

The video game industry has a negligible impact on the environment, as its activities are mainly digital.

Most of the products are sold through digital marketplaces and the Group aims to progressively reduce sales in physical stores. Although the environmental impact is considered very low, the Group actively monitors any solutions that may reduce the environmental impacts of the Group's activities to date and in the future.

The Group updates obsolete equipment as much as possible and recycles all components correctly. The Group stores everything in a digital format and prints documents only if required by the Law or if the scope of a specific task requires it. Consumables such as printer toner and similar waste are returned to the supplier for correct recycling. The Group is committed to replace travel with digital communications (i.e. video conferencing) to improve sustainability both from an environmental and a cost reduction standpoint.

Non-current receivables and other assets included for Euro 6,547 thousand by the receivable from Starbreeze AB (purchased from Smilegate Holdings). The receivable has a nominal amount of around USD 16.3 million and was purchased for a consideration of Euro 100 thousand. The amount has been restated and Euro 2,321 thousand have been recognized as financial income. The receivable was part of the Starbreeze AB corporate restructuring process and will be paid in accordance with the payment plan agreed with the District Court in Sweden, but not later than December 2024.

The remaining part amounted to Euro 903 thousand and related to security deposits for contractual obligations.

Deferred tax assets were calculated on tax loss carryforwards and temporary differences between the carrying value and the tax deduction period. They have been estimated at the tax rates expected in the period when the asset will be realized, or the difference will be settled.

Non-current financial activities consisted entirely of the fair value measurement of the convertible bond issued by Starbreeze AB with a nominal value of SEK 215 million and maturing in December 2024, as described in the Significant Events during the Period section of the Interim Report at March 31st, 2022.

CURRENT ASSETS

Total current assets decreased by Euro 19,180 thousand compared to June 30th, 2021 due to a Euro 14,656 thousand decrease in cash and cash equivalents and lower trade receivables for Euro 5,065 thousand.

Other current assets are analyzed as follows:

Euro thousand	March 31st, 2022	June 30th, 2021	Change
Receivables for video game user licenses	3,645	5,112	(1,467)
Receivables for video game development operating costs	13,380	11,467	1,913
Advances to suppliers	2,808	2,359	449
Other receivables	277	341	(64)
Total other current assets	20,110	19,279	831

Receivables for video game licenses were advances paid for licenses not yet exploited or completely exploited as at the reporting date. They decreased by Euro 1,467 thousand over the period to Euro 3,645 thousand.

Receivables for video game development operating costs amounted to Euro 13,380 thousand and included advances paid for video game programming services, quality assurance and other operating costs.

NON-CURRENT LIABILITIES

Total non-current liabilities increased by Euro 3,580 thousand because of a new medium-long term loan.

Employee benefits reflected the actuarial value at the closing date of the Group's liability towards employees, as calculated by an independent actuary in accordance with the IAS 19 provisions.

Non-current provisions were entirely made of the sales representatives' termination indemnity provision.

Other non-current payables and liabilities amounted to Euro 4,039 thousand and was the portion of the debt due after twelve months for the purchase of the Australian companies.

CURRENT LIABILITIES

Total current liabilities decreased by Euro 6,116 thousand mainly due to lower trade payables for Euro 6,247 thousand and lower other current liabilities for Euro 4,729 thousand, partially off-set by a Euro 6,131 thousand increase in current financial liabilities.
